WELCOME NOTE

Brax Telecomms is a unique Information and Communication Technology company that positioned to capture opportunities of rapid change in today's world technology.

We tie-up and collaborate with world-renowned brands. We deal in a wide variety of products and services as one complete customers solutions' stop for your business to run, be it a small-scale, medium or large enterprise .

The company was established in July 2011 to broadly reach various customers by identifying their requirement and providing them the best ICT Solutions that will drive their business smoothly and in a very cost-effective way. The Company operates efficiently, quickly and accurately while responding to our clients' needs.

It is with great pleasure to welcome and encourage you to take advantage of our products and solutions that we are offering.

MISSION

“ To surpass customers’ anticipation by providing most irreplaceable and innovative products and solutions.

”

VISION

“ To become smart and irreplaceable Information and Communication Technology service Provider of Excellency.

”

Our Approach

Quality Assurance

- Business and technology specialists sit in an open plan environment to encourage close interaction.
- Development cycle is incremental and based on rapid and agile methodologies

Expertise

- Project managers and other technical staffs are all strong technology specialists with business knowledge.
- All sign-off and approvals on business functionality remains the sole prerogative of business specialists

Delivery

- Our projects have a maximum timeline of months depending on project nature. Shorter cycles are customers privileges.
- Each phase delivers real business functionality and business benefit.

We offer both analogue and IP Based CCTV Cameras

HIKVISION®

Brax Telecomms designs and implements complete network infrastructure for data center, enterprise and small-to-medium business entities. Our solutions leverage industry-proven Ethernet and fiber technology to promote faster and more cost-efficient transport and processing of voice, video and data across both wired and wireless networks. We offer network infrastructure that is scalable, secure and easy to manage.

Our products are found in a wide variety of networking equipment including Ethernet switches, routers and gateways, security appliances, DSLAMs, 3G/4G wireless , UTP cables and VoIP hardware, desktop and notebook computers, servers and storage appliances, and network-attached printers

Fire Alarm System

The company provides trusted and comprehensive fire alarm systems that cater to our clients' needs.

We provide a wide range of fire products and customized fire system solutions tailored to the needs of different industries. Our fire products are based on international conformity standards and certification such as China's CCC, the international UL, the global LPCB, Europe's CE, etc.

GST852RP and GST8903 Repeater Panel can be connected with the FACP via 485 network card. When one or more detectors alarm fire, the repeater panel can display the location and alarm message of the detectors with audible and visual signals. Through communication loop, it can be connected with FACP, disposing and displaying the data from the FACP.

Prime, Classic, and Standalone are designed to meet unique requirements and empower your business performance. Qniq digital signage solutions are tailored for your client's business needs .

CaptivAD PRIME is digital signage software designed dedicated for small and medium projects requiring less than 200 digital signage players. The beauty of PRIME is in its light structure. It provides more options to eliminate the difficulties in digital signage player installation, content design, distribution and display complexity.

- ⇒ up to 200 nodes scalability
- ⇒ No database or server requirement Intuitive and hassle-free CMS interface
- ⇒ Easy Pull-Push deployment to reduce workloads and overhead costs.
- ⇒ Flexible Scheduling.
- ⇒ Pull - Push Network Delivery.
- ⇒ Roll based permission and complete management function.
- ⇒ Low cost of ownership.

Pull-Push Network Delivery

XG Firewall offers the world's best Unified Threat Management (UTM) protection that's easier to manage, with unmatched value.

More-in-One Protection

XG Firewall offers more in one appliance than any other UTM, including reporting, email, and a web application firewall.

Easier Management

XG Firewall and Sophos Central have been designed from the start to make day-to-day management easy.
